

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Trea Emerging Markets Credit Opportunities

A Sub-Fund of TREA SICAV C LU0629658435

Sub-Fund managed by: Degroof Petercam Asset Services S.A.

Objectives and investment policy

Objective

- To earn current income and to increase the value of your investment over the long term.

Portfolio securities

- Under normal conditions, the Sub-Fund mainly invests in bonds issued (or guaranteed) by emerging or frontier markets governments or by companies based in emerging or frontier markets countries or which do business in emerging or frontier market countries.
- The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging), for efficient portfolio management, or to directly seek investment returns.

Investment process

- The investment manager uses a top down process to formulate a macro view and a bottom up process to select individual securities for investment.

Designed For

- Investors who want to invest in the bond markets of emerging market countries, understand the fund's risks and have an investment horizon of at least 3 years.

Sub-Fund Reference Currency USD

Orders to buy and sell shares will be processed each business day.

The Sub-Fund issues accumulation shares (shares in which any income earned is added to the share price) as well as income shares (shares that pay out net income to you).

Terms to Understand

- Bonds** Securities that represent an obligation to repay a debt, with interest.
- Derivatives** Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.
- Emerging markets** Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.
- Frontier markets** Within emerging markets, those that are particularly small, new or under-developed.

Risk and reward profile

- The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.
- The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the Sub-Fund's share price over five years). Going forward, the Sub-Fund's actual volatility could be lower or higher, and its rated risk/reward level may be changed.
- The Sub-Fund's risk level reflects the following:
 - The Sub-Fund invests mainly in emerging markets, which generally are more volatile than markets of more developed countries.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

- Default risk** A bond may lose part or its entire value if the issuer is unable to pay interest or repay principal on schedule.
- Derivatives risk** Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.
- Counterparty risk** The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honor its commitments to the Sub-Fund.
- Management risk** Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.
- Operational risk** In any market, but especially in emerging markets, the fund could lose some or all of its money through a failure in asset safekeeping or through fraud, corruption, political actions or any other unexpected events.
- Liquidity risk** Certain securities could become hard to sell at a desired time and price.

Charges

The charges you pay as an investor in the sub-fund go to cover sub-fund operating costs, including marketing and distribution costs. These charges reduce the performance of your investment.
